Summary of testing:

Tests performed (name of test and test clause):	**Testing location:**
TLP-9001-40-01 was subjected to full test. Both models were subjected to construction check.	DEKRA Testing and Certification (Shanghai) Ltd. Guangzhou Branch Block 5, No. 3, Qiyun Road, Huangpu District, Guangzhou, Guangdong, China

Summary of compliance with National Differences (List of countries addressed):

☒ EU group differences

Use of uncertainty of measurement for decisions on conformity (decision rule) :

☒ No decision rule is specified by the IEC standard, when comparing the measurement result with the applicable limit according to the specification in that standard. The decisions on conformity are made without applying the measurement uncertainty ("simple acceptance" decision rule, previously known as "accuracy method").

☐ Other:… (to be specified, for example when required by the standard or client, or if national accreditation requirements apply)

Information on uncertainty of measurement:

The uncertainties of measurement are calculated by the laboratory based on application of criteria given by OD-5014 for test equipment and application of test methods, decision sheets and operational procedures of IECEE.

IEC Guide 115 provides guidance on the application of measurement uncertainty principles and applying the decision rule when reporting test results within IECEE scheme, noting that the reporting of the measurement uncertainty for measurements is not necessary unless required by the test standard or customer.

Calculations leading to the reported values are on file with the NCB and testing laboratory that conducted the testing.

Copy of marking plate:

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

Representative

Location: affixed on position where visible during installation, normal use and replacing lamp.

Remark on above marking:
1. The height of graphical symbols are more than 5 mm;
2. The height of letters and numerals are more than 2 mm;
3. The height of rubbish bin symbol is more than 7 mm.

General remarks:

"(See Enclosure #)" refers to additional information appended to the report.
"(See appended table)" refers to a table appended to the report.

Throughout this report a ☒ comma / ☐ point is used as the decimal separator.

This report will not be used for social proof function in China market.

Manufacturer's Declaration per sub-clause 4.2.5 of IECEE 02:

The application for obtaining a CB Test Certificate includes more than one factory location and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided ..... :	☐ **Yes** ☒ **Not applicable**

When differences exist; they shall be identified in the General product information section.

Name and address of factory (ies).....: Same as applicant.

General product information and other remarks:

The products in this report were tested/evaluated and complied with following standards:
- IEC 60598-2-1: 2020 used in conjunction with IEC 60598-1: 2020
- EN IEC 60598-2-1: 2021 used in conjunction with EN IEC 60598-1: 2021 + A11: 2022
- EN 62493: 2015

The products covered in this report are ceiling mounted luminaires equipped with E27 lamp holder. Both models have similar mechanical and electrical construction except the outlook color. Used LED lamps on these two models shall be able to comply with IP44 requirement. (Revised on 2024-06-20)

The products do not contain any active electronic parts, so they are considered to comply with EN 62493: 2015 without any testing.

The codes above have the following meaning:

A - The component is replaceable with another one, also certified, with equivalent characteristics

B - The component is replaceable if authorised by the test house

C - Integrated component tested together with the appliance

D - Alternative component
