5. Report Results: based on measurements in most cases will identify the chemical constituents in the sample but not necessarily "the substance" which were originally used to produce the article, professional consults, products information, testing processes, features of materials, characteristics of the SVHC and chemical analysis etc to obtain the assessments results according to the ECHA "Guidance on requirements for substances in articles".
6. #: According to the applicant's request, the admixture of specimen A/B/C are tested as a whole. The testing results of specimen A/B/C may be different from that of any sole material in specimen A/B/C.
